

## 2018 INNOVATION AWARDS

### FOUNDATION WATERPROOFING MEMBRANE

#### **Dörken Systems Inc.**

DELTA-MS high-performance dimpled membrane uses Air-Gap Technology to keep the basement permanently dry and mold free. DELTA-MS keeps water away from walls and enables incidental moisture to travel harmlessly to the perimeter drain.

#### **Tremco Inc.**

WATCHDOG waterproofing products feature a polymer-enhanced, spray-applied asphalt flexible membrane that provides a minimum 40-mil thickness when cured. The membrane seamlessly spans foundation-settling cracks and remains elastic at low temperatures.

#### **Poly Wall Building Solutions**

Home Stretch Peel 'N Stick Waterproofing Membrane self-adhering sheets consist of a strong, pliable, high-density, polyethylene facing bonded to a rubberized asphalt waterproof compound. Engineered for use with ICF technology, it is also suitable for poured-concrete foundation walls.

### DOOR COMPONENTS

#### **Endura Products, Inc.**

New Replaceable Deck Sill is the only replaceable model that can be removed and replaced in just a few steps, eliminating the need for excessive cleaning, repairs, or complete door replacements due to sill deck damage.

#### **Therma-Tru Corp.**

Therma-Tru door system components are engineered to work together to resist leaks and drafts and help maintain energy efficiency and weather resistance. The sill and bottom sweep form a tight seal against wind-driven moisture.

#### **Plastpro, Inc.**

A new line of decorative door accessory components complement unique product offerings. These accessory components have been designed with a scientifically formulated adhesive for use with Plastpro Fiberglass Doors.

# England's rain. India's monsoons. Norway's ice. Your budget.

This dimple protects basements from just about anything.

Sprays don't provide enough protection for your foundations. They crack when foundations crack, and can break down in just a few years. For protection that lasts, use DELTA®-MS. It features a vacuum-formed dimple pattern with exclusive Air-gap Technology, guaranteeing safe separation between the foundation wall and ground moisture. That means you can count on protection that lasts years longer and stands up to the most extreme conditions.

No one knows protection like we know protection. Visit [DELTA-MS.com](http://DELTA-MS.com)
